AWARDS

- 2022: Recognition for being part of the business intelligence team carrying out the programming and structuring process for the data integration project.

PROFESSIONAL PROFILE

Desktop and web application developer, specializing in full-stack applications, with experience in languages such as Java, CSS, and HTML, managing relational databases such as Oracle, SQL Server, and MySQL, incorporating architectural models such as MVC.

WORK EXPERIENCE

2020-Present
Avenue Escazú – Costa Rica

Grupo Financiero CAFSA
Systems Analyst in the BI area.

Functions performed:

Managed Oracle databases, creating reports (queries), updating and inserting data, creating objects such as tables, packages, stored procedures, functions, among others.

Developed desktop applications with Java Swing for data management, incorporating functionalities such as querying, deleting, updating data, establishing database connections, downloading information to Excel, and logging in via Active Directory.

Created a Web Service with the Java Restful API for storing database transactions.

Prepared documentation for production deployments.

Created BOTs with UiPath (RPA).
